Aspiring AI & ML Engineer currently pursuing B.Tech in Computer Science (AIML) at Christ University. Strong foundation in Python, Java, SQL and basic data structures. Completed hands-on academic projects including solar tracking system, footstep power generation and SmartBusGo concept. Certified in Python, SQL and networking fundamentals. Seeking internship opportunities in AI/ML, software development or data-related roles.

EDUCATION

Bachelor of Technology – Computer Science (AI & ML)

Christ University, Kengeri Campus, Bangalore

2024 – 2028 (Pursuing)

CGPA: 3.3 / 4.0 (till 3rd semester)

Minors: General Management

No backlogs

Class 12 – CBSE (Maths ,Computer Science)

St. Joseph’s School, Manavalakurichy, Tamil Nadu

2024

68%

Class 10 – CBSE

St. Joseph’s School, Manavalakurichy, Tamil Nadu

2022

76%

ACADEMIC PROJECTS

Solar Tracking System

Sem-1

Built a solar tracker using LDR sensors to detect sunlight direction and automatically rotate the panel for maximum efficiency. Gained practical experience in sensors, circuits and hardware integration.

Footstep Power Generation System

Sem-2

Developed a prototype using piezoelectric sensors to generate electrical energy from human footsteps. Improved understanding of energy conversion and real-time testing.

SmartBusGo – Startup Idea

Sem-3

Proposed a smart bus tracking and digital ticketing solution. Worked on concept design, problem analysis and presentation of user-focused features.

Stop-and-Wait Protocol Simulator

Sem-4

Simulated the Stop-and-Wait ARQ protocol to demonstrate reliable data transmission with acknowledgments, timeout and retransmission. Built a simple interface and hosted on GitHub.

CPU Scheduling Visualizer (OS)

Sem-4

Developing an interface to visualize CPU scheduling algorithms like FCFS, SJF and Round Robin with Gantt chart, waiting time and turnaround time calculation.

Hotel Booking & Room Management System

Sem-4

Built a web-based hotel booking system using Angular with room browsing, booking interface and admin dashboard using a mock backend.

TECHNICAL SKILLS

Programming:

Python, Java (Basic), C (Basic), SQL

Core Concepts:

Data Structures (Basic), OOP, DBMS Basics

Web Basics:

HTML, CSS, JavaScript (Basic)

Tools:

Git & GitHub, Canva, Linux (Basic)

Other:

Basic knowledge of sensors, mini-projects and hardware integration

CERTIFICATIONS

- Python Programming – Udemy
- AI Principles – Udemy
- Network Fundamentals – Infosys
- Java Basic – HackerRank
- Python Basic – HackerRank
- SQL Basic – HackerRank
- SQL Intermediate – HackerRank
- UI/UX Developer – L&T EduTech (First Class)
- Advanced JavaScript Frameworks (Angular) – L&T EduTech (First Class)

SOFT SKILLS

- Communication
- Presentation
- Time Management

- Problem Solving
- Quick Learner
- Adaptability

INTERESTS

- Artificial Intelligence & Machine Learning
- Software Development
- IoT Mini-Projects
- Startup/Product Ideas

EXTRACURRICULAR

- Designed posters and presentations for academic projects
- Participated in project exhibitions
- Active interest in cricket and sports

INTERNSHIP

ISRO PROPULSION COMPLEX (IPRC) MAHENDRAGIRI

DECLARATION

I hereby declare that the information given above is true to the best of my knowledge.
